TOP 10

OF THE MOST FREQUENTLY ASKED QUESTIONS

MY ZEFIT IS ALREADY CONNECTED TO ANOTHER ACCOUNT, WHAT SHOULD I DO ?

My ZeFit is already connected to another account, what should I do ?

If you don't know the logins of the previous user, please send us (support@mykronoz.com) a screenshot including the D/N number that appears below the error message.

This D/N number will allow us to track with which email address your MyKronoz device is connected, and if needed, to unpair it from this account.

[PC / MAC users]

The D/N number can be found on the bottom right-side of the Software welcome page

MY ZEFIT SHOWS SET UP, WHAT SHOULD I DO?

This message on your device display prompt you to set up the product using ZeFit mobile application (iOS or Android) and/or PC/MAC software.

I WOULD LIKE TO CONNECT MY ZEFIT TO ANOTHER ACCOUNT, HOW CAN I DO THAT?

For this, you need to:

- open ZeFit mobile application, go into SETTINGS > SET UP > UNPAIR
- then log out from your session
- sign up with another email
- Pair your ZeFit with this new email account

[MAC or PC users] Open the software, Go to the "Device Manager" tab, click on "Unpair" in the right hand-side of the table. Log out, and sign up with another email address.

ZEFIT SHOWS INCORRECT TIME AND DATE

In order to get the correct time and date on your ZeFit display, proceed as follows :

- Paired and set up ZeFit using a mobile phone: download and install ZeFit [iOS](#), [Android](#) or [Windows Phone App](#) on your smartphone, then create an account and follow the instructions on screen. After a successful pairing, time and date will be automatically synchronized.
- Set up ZeFit using a computer: download ZeFit PC or MAC software from [MyKronoz website](#), install the software on your computer, and follow the instructions on screen

<http://app-ZEFIT.mykronoz.com/softwareAppDownload>

ATA SYNCHRONIZATION IS NOT WORKING, WHAT SHOULD I DO?

- Open and connect to your ZeFit mobile phone Application
- Press the syncing button on the top right hand of the mobile Application
- Then, make sure ZeFit display is turned on to initiate the Bluetooth connection and ensure successful synchronization of data

If you still experience some problems:

- Make sure you have Wifi / 3G network
- Reset your mobile device
- If you are using an iPhone: Double press the Home Button and remove the window corresponding to ZeFit Application

HOW CAN I UPGRADE MY ZEFIT WITH THE LATEST FIRMWARE AVAILABLE?

- Download and install ZeFit PC or MAC software available on MyKronoz website
- Plug zeFit into the USB port of your computer and follow the instructions on screen to upgrade your ZeFit firmware

HOW TO USE ZEFIT WITH WINDOWS PHONE?

To make your ZeFit compatible with Windows Phone devices, you have to update the firmware of ZeFit to an adapted version for Windows Phone.

Therefore you have to follow these instructions carefully:

- Download and install the latest version of PC / Mac software on your computer. The software can be downloaded here.
- Start the navigation software and choose Windows Phone as user type.
- **Connect and log** into your account using your login, the firmware update will start automatically.

Finally, install the application for Windows Phone available here and follow the pairing procedure.

WHAT CODE SHOULD I ENTER TO PAIR WITH MY ZEFIT ?

No password is required to pair ZeFit to your mobile phone, you should download the App and follow the instructions given on screen

MY ZEFIT SHOWS MEMORY FULL, WHAT CAN I DO?

ZeFit internal memory is limited to approximately 7 days of activity.

Once the memory is full, you need to synchronize your data using the mobile application (iOS or Android) or the PC / MAC software in order to save your data into the cloud, and release some free space to track your new activity.

I AM STUCK ON THE WELCOME PAGE OF THE SOFTWARE AND MY ZEFIT IS NOT DETECTED.

[For PC]

Make sure the ZeFit is well positioned on its charging dock and plug to your computer.

- Turn off the bluetooth connections (from your Bluetooth devices list on your smartphone and from your App).
- Unplug and plug the device back in.
- Try again on a different USB port.
- Update the driver on your PC, the driver is usually located in this folder: C:\Mykronoz\ZeFit\usbdriver
- Restart your computer.

[For MAC]

- Make sure the ZeFit is well positioned on its charging dock and plug to your computer.
- Turn off the bluetooth connections (from your Bluetooth devices list on your smartphone and from your App).
- Unplug and plug the device back in.
- Try again on a different USB port.

— SET-UP AND PAIRING —

1. FIRST, DO NOT FORGET TO CHARGE ME

Before the first set-up, we recommend you to charge your ZeFit for about 1h30. Make sure to well align the charging clip posts with the contacts on the back of ZeFit. Plug the USB cable to a power source. A battery indicator will be displayed on the screen.

2. SET-UP AND PAIRING

You can set-up your ZeFit either with a smartphone or a computer. In order to know if your device is compatible or not, please refer to the technical sheet « [Devices I am compatible with](#) »

Set-up with a Smartphone

iOS users

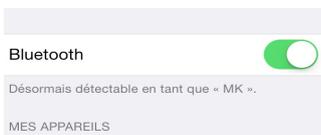

PAIRING WITH MOBILE APP

Download **ZeFit** App for iOS from the App store

Sign up if you are a new member or **Log in** with your existing account. Follow the steps on screen

Enable Bluetooth on your Android phone

Click and hold down the main button of your ZeFit to switch on the screen and enable the connection between the two devices

This step allows you to synchronize the time, date, activity and sleep data and reminders.

Android users

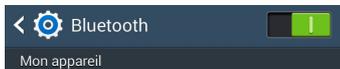

PAIRING WITH MOBILE APP

Download **ZeFit** App for Android from the Google Play Store

Sign up if you are a new member or **Log in** with your existing account. Follow the steps on screen

Enable Bluetooth on your Android phone

Click and hold down the main button of your ZeFit to switch on the screen and enable the connection between the two devices

This step allows you to synchronize the time, date, activity and sleep data and reminders.

PAIRING WITH MOBILE APP

To make your ZeFit compatible with Windows Phone devices, you have to update the firmware of ZeFit to an adapted version for [Windows Phone](#).

Therefore you have to follow these instructions carefully:

- Download and install the latest version of PC / Mac software on your computer. The software can be downloaded [here](#)
 - Start the navigation software and choose Windows Phone as user type.
 - Connect and log into your account using your login, the firmware update will start automatically.
- Finally, install the application for Windows Phone and follow the pairing procedure.

Download [ZeFit](#) App for Windows Phone from Windows Phone store

Sign up if you are a new member or **Log in** with your existing account. Follow the steps on screen

Enable Bluetooth on your Windows phone

Click and hold down the main button of your ZeFit to switch on the screen and enable the connection between the two devices

Go to your Smartphone Bluetooth settings and tap on ZeFit to connect to the watch

Go back on the app and tap on the corresponding ZeFit watch

This step allows you to synchronize the time, date, activity and sleep data and reminders.

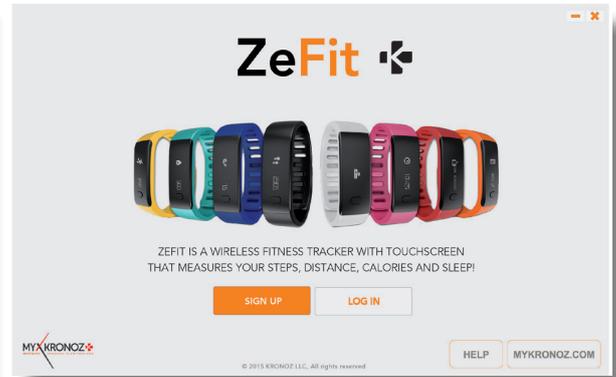

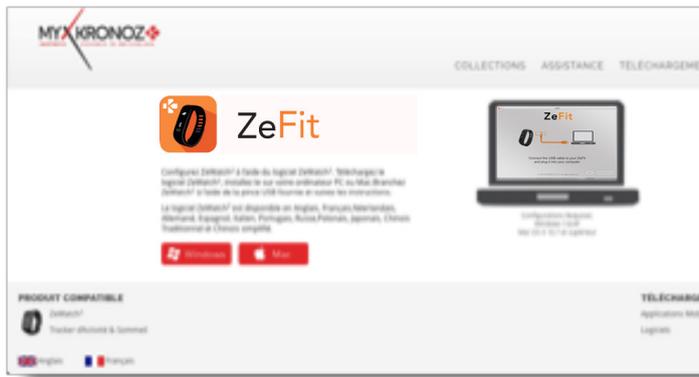

Set-up with a Computer

Windows

Windows PC or Mac users

Mac

Download ZeFit software for PC or Mac, available on [MyKronoz website](#)

Once the software has been installed, plug your ZeFit with the USB cable

Sign up if you are a new member or **Log in** with your existing account. Follow the instructions to set up your product

ANY HELP NEEDED?

You have downloaded and installed our PC or MAC software, however, your device is not recognized and you remain stuck on the Home Page. Here are our tips:

- **Switch off the Bluetooth connection** of your device before connecting it to the computer with the USB cable. To switch off the connection, forget the device from the list of available devices from the Bluetooth settings of your mobile phone.
- **Unplug and plug back** in the device until the USB port is available
- If « **unknown driver** » is displayed when plugging the device, it means that the driver installation is not successful. You will have to manually install it. In your settings, click on the USB driver tab and select the driver that corresponds to your device
- **Restart your computer**
